

ABSTRACT

CRIMINAL "LOCK"DOWN - AN ANALYSIS OF CRIMES DURING LOCKDOWN

***SUTIKSHAN RAINA**

Coronavirus is an infectious disease caused by a newly discovered coronavirus. Most people infected with COVID 19 virus will experience mild to moderate respiratory illness and recover without requiring special treatment. Older people, and those with underlying medical problems like cardiovascular disease, diabetes, chronic respiratory disease and cancer are more likely to develop serious illness. This paper talks about the analysis of crimes during lockdowns. This paper does not only deal with the Indian model of lockdowns but also takes into account the crimes committed during lockdown in major states of the country.

It further provides a comparative analysis as to where the country stands in the dynamics of the criminal shift of the types of offences. The paper also deals with various legislations that deal with the crimes during lockdown.
